### INTERVIEWER INSTRUCTIONS

Regardless of what the answer is in question 10, question 11 asks about the highest grade that the person has completed. This is the last full grade completed, not the one in which the respondent is currently enrolled. For instance, if the respondent is currently enrolled in the third year of primary school, the highest grade completed is primary - 2 years. Remember to be careful in writing the answer - there are two parts: the first part asks for the level (nursery, primary, secondary, etc.) and the second part asks for the number of years of that level (not the total number of years of all schooling).
