

Kenya - 2009 Kenya Population and Housing Census (10 Per Cent sample, every 10th household), Population and Housing Census

Report generated on: July 17, 2014

Visit our data catalog at: <http://statistics.knbs.or.ke/nada/index.php>

Sampling

Sampling Procedure

1. Originally - Total count
2. 10 Per Cent, every 10th household

Weighting

Weight by 10 on every output

Questionnaires

Data Collection

Data Collection Dates

Start	End	Cycle
2009-08-24	2009-08-31	N/A

Data Collection Mode

Face-to-face [f2f]

Data Processing

Data Editing

Data processing is a crucial and integral part of the post-census activities. Specifically, it involves data capture, processing and/or cleaning, and tabulation. The 2009 KPHC took full advantage of advances in ICT in the implementation of various census activities, especially cartographic mapping and data processing. While a variety of methods have been developed for capturing data for population and housing censuses, the KNBS opted for the OCR/ICR (Optical /Intelligent Character Recognition) scanning technology. After several consultations and also drawing from the lessons of the last census a decision was made to use the Integrated Computer Assisted Data Entry (ICADE) system, supported through technical assistance provided by the US Census Bureau. The census forms were specifically designed and enumerators specially recruited and trained to enhance the efficiency of the ICADE system, which, ideally, ought to run faster and use fewer staff compared to the other options considered. The ICADE process ran its full course by early July 2010 after capturing information from over 10 million forms.
