Overview

ABSTRACT

Kenya aims to become a middle-income country by 2030 delivering a high quality of life to all. This demands sustained, long-term productivity improvement through building human capital

and adopting improved technologies. But it also means ensuring that all Kenyans participate in this process both as a means and also as an end in itself. We don't just need growth, we need growth which is inclusive. When we look at the myriad ways in which finance influences the development of the economy and people's livelihoods, it is clear that if growth is to be inclusive then so must finance. What this means in practical terms is not as obvious as it might first seem.

UNITS OF ANALYSIS
Household and individuals

Sampling

Sampling Procedure

FinAccess targets individuals aged 16 years and above, with households drawn from the fifth National Sample Survey and Evaluation Programme (NASSEP V) household sampling frame. A total of 8, 669 households responded to the questionnaire - a response rate of 89%.

Weighting

The sample was weighted to cater for non-proportional distribution of households and non-response to provide estimates that are representative of target population at national and sub-regional levels.
