Overview

ABSTRACT

The food security situation is in stressed phase (IPC phase 2) in mixed farming and marginal mixed farming it is in minimal phase (Phase 1)

- There was poor performance of short and long rains leading to water stress in the households, low crop production.
- Low rainfall led to inadequate pastures leading to migration of livestock, low production of milk.
- The body conditions of livestock deteriorated leading to poor prices, while crop prices is increasing.
- Current drought status is at alert phase and worsening (NDMA, Dec 2017)
