Questionnaires

Overview

The questionnaires were structured like the hotel questionnaires. Six questionnaires (one questionnaire per month) were administered to each establishment to the Managers to fill or designated respondents. Published in English. See the full questionnaire in the External Resources.

The questionnaire consists of the following sections:

occupancy and available capacity in these accommodation,
the type of seasonality in occupancy,
the turnovers,
the nature of employment (permanent/temporal) and
the nationality of guests to these facilities,etc.

Data Collection Notes

The study covered all the establishments falling under the category of Cottages, Villas, Campsites and Apartments. In order to comprehensively understand and identify the facilities, the study was a collaboration involving key Government players. These were KNBS, MoT and KTB. In order to cover the entire country within minimum time, thirty six research assistants and twelve supervisors were trained on the survey techniques. These were later grouped into twelve teams comprising three Research Assistants (RAs), one driver and one Supervisor. The twelve teams were thereafter assigned different parts of the country such that they covered all the areas of interest. A team of three regional coordinators was formed and mandated to ensure all the areas are covered. In the field, the teams worked closely with the Regional Tourist Officers (under the MoT) and the District Statistical Officers (under KNBS) who ensured facilities of interest were covered. These officers also assisted in identifying the establishments of interest

Data Processing

Data Editing

Data editing was in 2 stages throughout the processing, including:

- a) During data entry
- b) During data cleaning using SPSS

Other Processing

Other editing was done during tables generation and during report writing.

Data Appraisal

Estimates of Sampling Error

No sampling error
