KEN-KNBS-ISS-2011-v1.0

Version

VERSION DESCRIPTION
Version 1.0 (May 2014)

PRODUCTION DATE
2011-05-12

NOTES
This survey has no separate report since it was meant for Kenya National Bureau of Statistics internal consumption.

The data was collected in 2011 and analysed 2012

Overview

ABSTRACT
The purpose of the survey is to obtain detailed financial information of enterprise in the services for compilation of business and economic statistics to monitor performance of the sector.

The data collected was used to estimate contribution of the services sector to the economy.

KIND OF DATA
Administrative records data [adm]

UNITS OF ANALYSIS
Establishment

Scope

NOTES
The survey consist of the following sections:

Particulars of the Establishments/Enterprise

Section A: Economic Activities

Section B: Employment

Section C: Income Items(Kshs)

Section D: Inventory

Section E: Expenditure Items

Section F: Fixed Assets,2010

Questionnaires

Overview

The questionnaire for ISS were structured based on what was provided by the consultants and experts. Each questionnaire consists of the following:

Section A: Economic Activities
Section B: Employment
Section C: Income Items(Kshs)
Section D: Inventory
Section E: Expenditure Items
Section F: Fixed Assets,2010

All questionnaires and modules are provided as external resources

Data Collection

Supervision

Interviewing was conducted by teams of interviewers. Each interviewing team comprised of 4 research assistants, a field supervisor, field co-ordinator and a driver. Each team used 4 wheel drive vehicle to travel from one cluster to the other in the most difficult terrain.

The supervisor was involved in supervising the data collection in the field while the co-ordinator was involved in co-ordinating the field supervisors. The co-ordinators were directly under the Director General who is the overall co-ordinator of the survey.

There was also a QC(Quality Control) who used to check the quality of the data before the data entry was done.

The data was captured by data entry clerks in the data processing section at the Kenya National Bureau of Statistics head office in Nairobi, under the supervision of the Director ICT, assisted by the managers.

Data Processing

Data Editing

Data editing took place at a number of stages throughout the processing, including:

- 1) Field editing
- 2) Office editing
- 3) During data entry
- 4) Secondary editing

Detailed documentation of the editing of data can be found in the "Data Processing guidelines" which can be given in soft copy upon request

Other Processing

The data entry was processed in batches, with each batch being processed as a complete unit through each stage of data processing. Each batch has to go through the following steps

- 1) Questionnaire reception and numbering
- 2) Office editing and serialization of the batches
- 3) Double Data entry
- 4) Verification
- 5) Back up of the raw data
- 6) Secondary editing
- 7) Backing up of edited data

After all the batches are processed, data is concatenated together and the following steps are completed

- 8) Export to SPSS, R, STATA
- 9) The variables are auto recoded in SPSS or recoded in other statistical software
- 10) The data is then weighted
- 11) The data is then merged
- 12) Data quality tables are produced
- 13) Final data analysis is done

More details of each of these steps can be found in the data processing documentation, data editing guidelines, data processing programs in CPro, SPSS,R,STATA and other statistical software, and tabulation guidelines.

Data Appraisal
