

Laboratory Samples Transportation Form

Kenya National Micronutrient Survey-2011

List of Plastic Storage Boxes (PCR tubes), Cryovial Boxes and racks with blood and Urine Samples

To be completed and maintained by the field lab in-charge. At the time of transporting samples, a copy of the list should be sealed in a Ziploc bag and taped to the Styrofoam box used for transporting the samples. A separate form should be filled out and given to the team leader to maintain a copy of the list in their files.

Team # _____ Date of packing box _____ / _____ / 2011
Day Month

Time of packing box _____ Amount of dry ice in box (Kg) _____
